獨立評論人潘麒智指出：「本地疫情持續平穩，昨日只有一宗輸入個案，而沒有本地源頭不明個案。不過，卻有愈來愈多學校爆發流感。由於病徵與新冠肺炎相似，政府或需在策略上再作調整。事實上，疫情與流感已經成為地球風土病，『與病毒共存』根本是唯一出路，建議港府可早着先機，勿再猶豫。」

**Independent commentator KC Poon observed, “Hong Kong’s situation continues to be stable, with only one imported case yesterday without any local case of unknown origin. However, more and more schools are experiencing influenza outbreaks, and since the symptoms are similar to those of COVID-19, the government may need to adjust its strategy. In fact, both COVID-19 and influenza have become endemic diseases of the earth so ‘coexisting with the virus’ is the only way out. The government should better move early.”**
