PopPanel Research Report No. 117 cum “We Hongkongers” Research Report No. 80

Survey Date: 13 to 15 December 2021

Release Date: 17 December 2021

Copyright of this report was generated by the Hong Kong Public Opinion Program (HKPOP) and opened to the world. HKPOP proactively promotes open data, open technology and the free flow of ideas, knowledge and information. The predecessor of HKPOP was the Public Opinion Programme at The University of Hong Kong (HKUPOP). “POP” in this publication may refer to HKPOP or HKUPOP as the case may be.

Research Background

“We Hongkongers” is an initiative advocated by Hong Kong Public Opinion Program (HKPOP) of Hong Kong Public Opinion Research Institute (HKPORI), with the support of many members of the civic society. With reference to the petition website “We the People” hosted by the White House of the United States, “We Hongkongers” aims to reflect public sentiment by conducting scientific research on any issues raised by Hong Kong citizens: https://www.pori.hk/wehongkongers_factsheet_20191017_chi.

“We Hongkongers” Project officially started on 17 October 2019, in the form of intensive rolling surveys. A total of 12 reports were published as of 23 December 2019. In mid-May 2020, in response to the rapid changes in Hong Kong’s political and public sentiment, HKPOP redeveloped the “We Hongkongers” Project. Coupled with the rapid development of the “HKPOP Panel” established by PORI in July 2019, PORI decided to launch the “We Hongkongers Panel Survey” to further strengthen interaction with the public and as well as collect and analyze public opinion and there are 29 reports in total. In January 2021, PORI redeveloped the “We Hongkongers” Project again to strengthen the cooperation with non-governmental organizations, civil society organizations, concern groups and professional organizations, and the results will be released in the form of mini-forums to initiate policy discussions.

This report also represents Report No. 117 under HKPOP Panel survey series, as well as Report No. 80 under the “We Hongkongers” Project Series. The research is co-organized with the Election Observation Project on the theme of Legislative Council Election survey.

HKPOP sent out emails to all panel members at the beginning of the survey, inviting them to fill in the questionnaire at the designated online platform. Members were allowed to make repeated submissions, while only the last submission of each individual member would be used for analysis.

Contact Information

Herewith the contact information of the “We Hongkongers” Panel Survey:

Table 1: Detailed Contact Information

Survey method	Online survey
Target population	HKPOP Panel samples, namely Hong Kong People Representative Panel (Probability-based Panel) and Hong Kong People Volunteer Panel (Non-probability-based Panel)
Weighting method	The figures are rim-weighted according to 1) age and sex profile of registered electors and the distribution by geographical constituencies from 2021 Final Register provided by the Registration and Electoral Office; 2) rating distribution of Chief Executive and political inclination distribution of registered electors from regular tracking surveys.
Date of survey	13 December, 3pm – 15 December, 3pm
Total sample size	7,039
Response rate	7.9%
Sampling error ^[1]	Sampling error of percentages at +/-1% at 95% confidence level

[1] All error figures in this release are calculated at 95% confidence level. “95% confidence level” means that if we were to repeat a certain survey 100 times with different random samples, we would expect 95 times having the population parameter within the respective error margins calculated. Because of sampling errors, when quoting percentages, journalists should refrain from reporting decimal places, whereas one decimal place can be used when quoting rating figures.

PopPanel Composition

Regarding data collection, survey data from both the Hong Kong People Representative Panel and Hong Kong People Volunteer Panel were collected in the form of online questionnaire.

Among them, the Hong Kong People Representative Panel comes from members of the “HKPOP Panel” recruited in regular random telephone surveys. HKPOP uses “HKPOP Panel” as a framework for conducting surveys for different research projects, any eligible family member in the household may be invited to participate in a specific research.

Meanwhile, members of the Hong Kong People Volunteer Panel are recruited online. Citizens only need to self-register in HKPOP website to participate in online questionnaires.

All panel data collected will be adjusted using rim-weighting, to minimize the effects of self-selection bias or participation bias. Details are documented in the Weighting Procedure section.

Response Rate

HKPOP adopts a set of contact definition in compliance with most international standards. Historically, the social research community in Hong Kong has developed its own set of contact rates, cooperation rates, response rates, and so on. HKPOP normally reports the “success rate” for online surveys.

The calculation of the success rates in this study refers to the following tables.

Table 2: Calculation of success rate of the HKPOP Panel (by HKPOP definition)

Success rate		
=	$\frac{\text{Successful cases}}{\text{Panel size of the HKPOP Panel}}$	x 100.0%
=	$\frac{7,039}{89,170}$	x 100.0%
=	7.9%	

Weighting Procedure

HKPOP has continuously adopted and enhanced its weighting method over the past few decades. For this survey, HKPOP adopts a “2 by 5 by 10 by 4 by 5” weighting procedure involving five variables, namely, gender, age, electors by geographical constituencies, political inclination and rating of Chief Executive. Basically, the raw data of practically all random telephone surveys conducted by HKPOP are rim-weighted by the figures obtained from the Hong Kong Census and Statistics Department and/or Registration and Electoral Office so that the marginal distribution of the sample in terms of gender, age and electors by geographical constituencies would match with that of the general population figures from the Registration and Electoral Office. The marginal distribution of the sample in terms of political inclination and “rating of Chief Executive” would match that of the general population in HKPOP’s regular tracking surveys. This rim-weighting method (sometimes called raking) is found to be the most practicable method in processing HKPOP’s survey data.

Specifically, the gender and age groupings used for weighting are as follows:

- Male 18-29
- Male 30-39
- Male 40-49
- Male 50-59
- Male 60 or above
- Female 18-29
- Female 30-39
- Female 40-49
- Female 50-59
- Female 60 or above

The groupings for electors by geographical constituencies used for weighting are as follows:

- Hong Kong Island East
- Hong Kong Island West
- Kowloon East
- Kowloon West
- Kowloon Central
- New Territories South East
- New Territories North
- New Territories North West
- New Territories South West
- New Territories North East

The political inclination groupings used for weighting are as follows:

- Incline towards the pro-democracy camp
- Incline towards the pro-establishment camp
- Incline towards the centrist
- No political inclination / politically neutral / don’t belong to any camp

The “rating of Chief Executive” groupings used for weighting are as follows:

- 0 mark
- 1-49 marks
- 50 marks
- 51-99 marks
- 100 marks

Quantitative Analysis Results

Quantitative analysis results of the “We Hongkongers” Panel Survey, after applying the standard weighting procedures, are as follows, all questions listed hereby are opinion questions:

Do you have any survey question to suggest for our surveys?

(If you do not have any suggestion, please leave this space blank.)

Do you have any message you want us to forward to your District Councillor or other locally known persons you name here? (Please provide their identities and your contacts)

(The request you make here is not part of our study. We simply want to assist people who want to send a message to current or former District Councillor, new or senior community leaders, persons in charge of community organisations, and so on. If you do not have any suggestion, please leave this space blank.)
